Entered as second class matter April 21, 1911
at the post office at Estancia, New Mexico, un-
der the Act of March 3, 1879.

Norris H. Reed, advertising agent of the Santa Fe Railroad Company, will give New Mexico some suggestions about intelligent advertising at the Mountainair Chautauqua August 5. If Mr. Reed will advise us how to kill off some of the self-appointed car window experts who have given us anything but intelligent advertising in the past, his efforts will be appreciated all the more.

"The Magic of the Pump" will be the subject of an illustrated lecture by Hon. Ralph C. Ely, of Deming, at the Mountair Chautauqua August 5, and this lecture will be worth more than the price of a season ticket. Irrigation by pumping is going to be the solution of the problem in a great many places in the southwest and Mr Ely's fund of information on the subject will prove of inestimable value to those who hear him.

Hon. Alexander McPherson, of Roswell, former director of agriculture of Idaho, and one of the most successful horticulturists in the United States, will give an illustrated address at the Mountainair Chautauque August 5 on the subject, "The Fruitlands of the Sunshine State." He is preparing special slides for this lecture and the pictures will later be used for advertising purposes by the Bureau of Immigration.

She—"But why is it that you get engaged so often, Mr. Jones?" He—"Because I haven't the courage to marry."

Seeds are sprouting, trees budding, flowers peeping out from warm nooks. Everything grows in springtime. Youth is springtime, habits are sprouting, dispositions are putting out their leaves, opinions are forming.—Beecher

At what age does the little tapir lose his markings? A tapir born four months ago in the London zoo is a plump little animal, exactly like his parents, except it is strongly barred with white horizontal stripes, while, as everybody knows, old tapirs are plain, dark slate color. But now, after four months, the stripes are disappearing, those at the head being the first to go. Time has solved the problem.—New York Press.
